**SOUND ENGINEERING**  
**DAMELIN COLLEGE**

I was born on 09 March 1986 in an undeveloped place called Winterveldt under disadvantageous background. I am the fifth child of nine kids 5 boys and 4 girls. On January 2006 I was introduced to Bokamoso Life Center by the friend we I was graduated from the program called ADP meaning Adolescent Development Program. On August 2006 I was given a chance to audition for a drama group that performers in USA every year. On the year 2007 and 2008 I got a chance to be on a plane for the first time and the only person in my family. While I was in USA the most important things that I have learnt and enjoyed are mentorship and work visit, and how can I forget the most and important people who make sure that the scholarship is successful every year, the organizers, host families and every body who is contributing on this scholarship are people who make sure that we had breakfast, lunch, dinner, warm blankets and hot shower.

### **TERTIARY INSTITUTION**

In 2007 I was given a chance to go to college to study sound engineering which is the field I want to work and apply my technical skills to. This year is the last year of my course and I will be graduating by the end of this year. From the of my studies I didn't have any challenge because the money that was paid covered everything including books. But the only challenge I had was working on a computer which I have never worked on it before. The other challenge was to get up early in the morning at 4am, because it took me three hours to get to school. The college where I am studying is Damelin Centurion and it offers the best.

## **GOALS**

Me and two other young people from Bokamoso we have started a project in travel and tourism industry. The name of the project is Sgandi Tour and Travelers which we are busy on drafting the proposal and we still trying to get some funding to register the company. And we are going to make it a successful one. In the future I want to venture in the business of media communication and entertainment industry.
