

the future begins here
BOKAMOSO YOUTH PROGRAM

LESEGO SIBIYA

My name is Lesego Sibiyi I'm 20years old, Im leaving in Winterveldt. I have attended Bokamoso Youth Centre for a year in 2008. I'm currently studying Nursing at Healthnicon nursing college.

My challenge is not really my studies but my transport as I'm using public transport and it has its own problem there and there. But I don't consider it much as my school and I really understand how the transport can cause challenges as it's not our own transport.

Another challenge I get is that my parents are not too supportive, when I'm studying and doing my work properly I do sometimes expect their support but they really not in to giving me the appreciation for me to get a new start as their child. But I really now have found solution, my solution is to build a strong relationship with them showing them how I want them to react according to my studies. I am really going to make the scholarship to help me reach all my goals as a nursing student and I love to say thanks to Bokamoso and the Americans for helping me to reach the starting of my goals.
