BOKAMOSO YOUTH PROGRAM

NELLY JIYANE

My name is Nelly Jiyane from the loving and caring community of Winterveldt. I came at Bokamoso youth center last year August. I attended a three months program in ADP class and after graduating in November, I joined loveLife program which is an after care at Bokamoso.

Healthicon Nursing College is situated in Kilne Park via Mamelodi. My first day at the college everything was strange and some of the things were just the surprises. Anyway I was happy being at the college. The security at gate told us to get in our classes so that our tutors can inform us about everything about the college. They introduced themselves to us, they told us everything about the college and they told us to ask questions were we didn't understand.

The problem came when we started with our tests. I failed two tests and my life was having ups and downs plus transport problem but now I am just doing fine going with the flow. What I hate about the college is that even you have passed your final exam, chances are very limited to go to auxiliary class. They put you on a waiting list for at least one year, then maybe they will call you after a year. But they want 75% or over passed marks. If you get 50% up to 74% you have passed but you need to repeat the class in order to qualify for auxiliary. But with some schools you just go to auxiliary with 50%. As for me if get a space somewhere I will move to that school.
