

the future begins here
BOKAMOSO YOUTH PROGRAM

ZAKHELE MAKAMA

My name is Zakhele , I am a first year student at PC Training and Business College and I am currently studying a two year course which is Information Technology (Diploma) which covers for the modules for the first year.

- Foundation Programme
- Life Skills
- Information System
- Programming Visual Basic
- Web design
- Networks
- E-Commerce
- Business Communication

For the second year it covers the following modules:

- Project Management
- Information System
- Programming C++
- Networks
- Database System
- Quantitative Techniques
- Total quality Management
- Programming Java
- Work Based Learning

When I finish my Diploma, I will be website developer. The website developer is a person who creates the website and he must understand the scripting and editing language and be responsible for registration and promoting the site.

I have already passed my first semester very well. Now I am in second semester which is quite difficult for me because it covers so many tasks in a short time. The reason that I chose IT is that I will be able to work under supervision in different sectors of the information and communication industry and assist in planning, organizing, coordinating and controlling technology related activities.
